

Merlinus Anglicus Junior:
OR THE
TARRY MESSENGER

For the Year of our Redemption, 1704.
and from the Creation, according to Sacred Writ, 5653
Being Bissextile or Leap-Year.

herein is contained, (1) *Astronomical and Meteorological Observations.* (2) The State of the Year, deduced according to ART, from the Solar Ingresses, Eclipses, various Configurations, Aspects and Conjunctions of the Planets. (3) The *Rising and Setting of the Sun, Moon and Stars:* Together with many useful Tables pertinent for such a Work. accommodated to the Meridian of London, which lies in the Latitude of 51 deg. 32 min. North, but may indifferently serve without sensible Error) for any other part of Great Britain, to which is added *Monthly Observations and Astrological Predictions* (or *Conjectures*) upon the whole Year, &c. Also an *Ephemeris* of the *Diurnal Motions* both in *Longitude and Aspects* of the Planets, &c. The like (in all particulars) not extant. With Brief Remarks upon the great Conjunction of Saturn and Jupiter in Aries, and the Hieroglyphick of Lilly in 1653.

HENRY COLEY Teacher of the *Mathematics*, and the *Cælestial Science*, in Baldwin's-Garden.

The Three and Thirtieth Impression.

Alius alio plura invenire potest, Nemo omnino.

is, was before us, and will be when we are no more: War follows Peace, and Peace War, as Summer follows Winter, for Fortune's Wheel is continually turning, and all Mankind ceases not to All the same things over and over again, which must be expected to the end.

L O N D O N

of Stationers. 1704.

Upham

To the Candid Readers.

Senesco, cum venia datur plura possum.

Gentlemen!

I Do here once more (at least) adventure to appear to the World in the Nature amongst the rest of my Brethren in the 70. Year of my Age, and present my Astrological Judgement upon the Year 1704. according to the Genuine Rules of Astrology (an Art that Reasons from the Cause to the Effect) in which, without the least partiality, I have modestly hinted those Dangers and Calamities that seem impending, which I presume a prudent Person that hath but observ'd the Proceedings and Transactions of Europe of late Years, and doth also look back into Histories of former Ages may be able to make a rational Conjecture. Nor do I here endeavour to Pry into the secrets of the Almighty (as some are pleas'd to object) but as far as I am able by Human Knowledge in a natural way to attain, and thereby endeavour to Foresee and Predict. I conclude the Heavenly Bodies incline the Temperature of men, (and indeed of all Mankind in general) either to be virtuous or vicious; but no means force or compel the Will, according to that old Adage, *Agere non cogunt*. And thus we may certainly conclude that the various contingent Actions of Mankind in this inferiour World are guided and disposed by certain Celestial virtues, and proprieties passing forth and infused from the Etherial and Heavenly Nature, upon the whole Circumference of the Earth, and upon all things Subject to mutation. Therefore let what I have here delivered, be receiv'd with the same affect 'twas written, and if from the various Configurations, I have discover'd the wills of some men incline this year to Treachery and Disobedience to their Superiors, or to sow the Seeds of discord amongst their fellow Subjects; let all such beware lest judgment immediately overtake them folly, and they are forc'd to cry *Peccavi*, and Repent when 'tis too late. This year I have left out the Table of Houses, and Latitude of the Planets, to make room for more useful matter, they being only of use to Astrologers, who can supply themselves better upon occasion. And since it has been so much talk of the Hieroglyphick of the Lyon (or some Beast) publish'd by Mr. Lilly in 1655, and the Effects signified thereby to be now in Operation, I have therefore presented it again to the world that the intelligent thinking sort of persons may observe and judge thereof in this our Age of wonders. Till next year, God willing, farewell.

Your old Friend and Annual Servant

July
1703.

THIS Table shews the Interest of any sum of Money, from 1l. to a 100l. from a Day to a Year. And by the help of Addition you may compute the Interest of any sum whatsoever; and note that for the greater exactness, the Penny is divided into 100 parts, so that 25 parts are a Farthing, and 50 parts a Half-penny, and 75 parts 3 Farthings, &c. *Example.*

The Interest of 100l. for six Months, one Week, and one Day, is thus found by the Table.

Ann 1 | 1664 | 1701 Mar. 8. | whom God preserve.

This Table tells us of our *Casars* Birth,
 When 'gan to Reign, how long they sway'd on Earth
 In Pageant Glories, real Cares and Pains:
 And last recounts the end of all their Reigns,
 Conclude in Dust; 'Tis so! What's Learned here
 But short Remembrances that once they were:
 Of Three times Ten, doth only one remain,
 Whom God Preserve, Grant Long and Prosperous Reign.

We now live in an Age, wherein great things are expected to be Transacted in Europe, and therefore it may be necessary to Premise this *Præcognita*, concerning the Grounds of our *Prædictiones*. *Sublunary Mutations* being subject to the Influence or Disposition of the *Stars*, or *Superiour Bodies*, we ought prudently to endeavour to search out the secret Myſteries and

Astrological Conjectures or Observations, &c.

Invidi, quid Laceras?
Hac bona si non sunt tu meliora
Doce.

We are now arrived to the Year 1704. wherein great things are expected to be *Transacted* all over Europe at least. We yet labour under the influence of the late famous *Conjunction* of the Superiors in the Sign *Aries*, the Sign of *England* in particular, & therefore great matters, as to changes and *Revolutions* in many Countries & Kingdoms under that Sign, (and those in square or opposition unto it) may assuredly be expected, of which we may frequently hear. Many scandalous lying *Pamphlets* dispersed, & 'tis strange if some Eminent *Gown Man* fall not under the lash about this time, but soon recovers himself again. The *Eng.* seem very active in most parts, but especially in our own Nation. And we receive daily intelligence which will be as gratefully accepted about the very end.

1704

February hath XXIX Days.

And Intentions thereof by Similitude, and Analogy of the Heavenly Bodies, which can never be perform'd without the Assistance of the most Sublime Art of Astrology, which in these days many pretend to largely, but yet few rightly understand, as not having an Apt Genius for such Speculations: For an Astrologer as a Poet, is Born, not Made. And the Art long since

Note that Venus is our bright Morning Star from the beginning of the Year till the 20. of August next, from thence to the Years end our Evening Star

FEBRUARY 1704

First Quarter the 1 day, near 4 afternoon.
Full Moon the 9 day, at a quarter past 8 at night.
Last Quarter the 17 day, at 7 in the morning.
New Moon the 23 day, at 16 min. past 11 night.

A tedious passage, gentle gales a while
Do fill its Sails, the Fleecing Seas do smile.

Note that the Roman Account (now since 1700) is always 11 days before the English, so that their 12 day is our first.

1704

March hath XXXI Day

Engl. Account.

since thus defin'd by Sir Chrystopher Heydon and others, viz. *Astrology is an Art which Teacheth by the Motions, Configurations, and Influences of the Signs, Stars, and Celestial Planets, to Prognosticate of the natural Effects and Mutations to come, in the Elements and those Inferiour Elementary Bodies. All that have hitherto writ against Astrology, or the greatest Adversary living, can't deny this*

Astrological Conjectures
or Observations, &c.

Sors omnia versat.

The Grand Actions of Europe in general are now prosecuted and carried on with more than ordinary celerity. We have an unlucky *Quadrature* of the *Infortunes* from *Cardinal Signs*, which may have as unlucky effects. Sometimes the Dissolution of Eminent Councils do follow, with Animosities between Persons of the *first Magnitude*, amongst the rest some of them must expect to be removed, or thrown out of their places of trust and profit, and 'tis to be feared we may too soon hear of some approaching *Revolutions* and *Changes*, or strange alterations in several parts of Europe. The Month should produce much unseasonable weather, whence comes, I fear, no small loss to our Merchants.

This Definition, nor answer Sir *Christopher's* defence of Judicial Astrology. This Definition contains not only the Causes that concur to the Constitution of the Nature and Essence of Astrology, but also expresses the end and Final Cause whereto all the Precepts of the Art are referr'd! 'Tis divided into two Parts, the one Speculative or Theoretical (*viz.* the Astronomical part

Astrological Conjectures, or Observations, &c.

Some of the late Configurations are yet operating, and now I may say there are many transcendent Actions upon the Stage of the World, and most Nations of Europe are active, of which we in England receive various reports, especially from France, Holland, Spain, and some Eastern Kingdoms or Countries, and much fraud and subtilty appears amongst the vulgar sort of a mobbith inclination, who would fain be in action: for now many vain disputes arise of some novel thing suddenly to break out, especially amongst those of dissatisfied humours, who trouble their Brains both to Talk, Write, and Rant to no purpose. Saturn and Mars are very busie with nimble Mercury. Many cheats acted now, and some insolent scoffers chastised, of w^{ch} will be worth while for any ingenious person to observe the Effects of such Configurations.

The other Practical, (or the Astrological or Judicial part) the First Teaches us to direct and know the Stars and Planets, and to find the Places and Motions, &c. The Second part Directs us to the Knowledge and right Understanding of their Influences and Operations upon Sublunary Bodies, and without this last, the former part is but a little use or Advantage to Mankind: Even as an Herbalist may

We have many notable
Configurations this Month,
 which in short seem to
 foreshew, that in many
 parts of *Europe*, as *Eng-*
land, France, Germany, Hol-
land, Poland, Sweedland,
Ireland, and Scotland, with
 several other Kingdoms and
 Countries therein, we may
 expect divers Meetings,
Treaties or *Conventions* of
 very great *Persons*, now or
 near this very time, whose
 Debates and Consultations
 should be of high Matters,
 tending to the Composure
 of those miserable Differen-
 ces ('tis to be feared) may
 be too visible at this pre-
 sent *juncture* of time. And
 farther, we fear sad com-
 plaint, not only for want
 of Trade, but of much Sick-
 nels, or danger of an ap-
 proaching *Pestilence* or mor-
 tal *Disease*, which may rage
 now or near this time in
 many places: from which
Good Lord deliver us.

may attain to the Knowledge of the names only of most Flowers, Herbs, and Plants he finds growing, yet without farther search and Inspection into Physiologie, he can give no Account of (or Describe) their Virtues, no more can Astronomy Direct or inform us, of the secret Influences or Operations of the Stars and Planets, without the assistance of this Divine (tho' much abused) Art.

0 M. 46 10 A 43		△	or	or	△	or	or	This Month the Planet Mars enters Aries, his own dignities, and there is saluted by a famous Trine of the Sun, from that Regal Sign Leo, and Jove continues in the Twins. I wish all Health, Peace & Prosperity, most heartily to old England, and her most Flourishing Metropolis. God preserve her many thousands of Inhabitants from Raging Diseases, and the City it self from Fires and all other Casualties. The French Monarch is still active and is resolved to continue so—but we fear the angry Frowns of Providence falls unhappily upon some of the German Princes; yet we have hopes that the Affairs of England (notwithstanding all endeavours to the contrary) continue still in a moderate good posture. The Month should end with pleasing News to the Nation, and such as labour to do good in their Generation. Au-

1704

August hath xxxi days.

Eng. Account.
M.D.

The first considers the general State of the World, & from Eclipses, Comets, Great Conjunctions, Annual Revolutions Quarterly Ingresses, and Lunations, also the Risings, Set-tings, and Culminating of Fix'd-Stars, together with the Configurations of the Planets, both to the Sun, and amongst themselves Judgment is deduced, and from thence the Astrologer doth frame his Annual Predictions of all Ser-vice.

10 M. 27	12 A. 33		oc	or	or	or	This month affords us many notable <i>Configurations</i> , whose effects will doubtless prove as considerable, tith ^e the Infortunes both fall Retrograde, & Mars & Mercury become Opposite one to the other, towards the end. We of the <i>English Nation</i> are not yet free from Doubts & Fears of some impending Change or Disaster. But we hope God Alm. will direct this Nations Councils & Actions so, that we need not fear the greatest Malice that can be contriv'd against us. And now Death in good earnest should remove many Aged Persons of Different Qualities. Who is there amongst us that is able to Recall what is past, Command what is present, or prevent what is to come? And now it plainly appears we live in very strange times wherein Villany is so much in Fashion, that some think it absurd to be Viruous.

4 M. 12 2 M. 35	☾	or	or	oc	oc	This Month affords us nothing but <i>Opposite Aspects</i> , and such we account cross; and Angry, Divine Providence has an unsearchable Depth, the bottom whereof of the Soundest Judgment of Man can never sound, as sometimes working effects by contrary causes. Great Calamities sorely oppress many Poor People, for the <i>Afflictions</i> now fear'd may be of long continuance, and occasion the Death of many. And now let the honest Traveller look to it, for he will find <i>High-way</i> Men and <i>Padders</i> very busy, especially in or about the E. Parts, and N. E. Parts of our Island, and 'tis strange if we have not <i>Tempestuous Storms</i> at Sea, with <i>Inundations</i> and overflowing of the <i>Sea Banks</i> , which about this time may produce much damage. In short, it should be a M. of much Action, and of very high and weighty Consultation in most parts of Europe.

5	28	3	M.	5	8	or	or	oc	o	oc	If ever there appear'd Great & Serious Counsels in Europe, I presume now is the Time; Accusations & com- plaints against some Persons in Power, may now be ex- pected. A Sad Fate seem to attend some High Spirited Grande in this Month which will be no small Grief to a Young Lady of his Relation. The Merchant complains of his Losses at Sea, & many Scandalous Pamphlets etai- red to Asperse Persons of Ho- nour. Treacherous Counsels now are made use of, & Men of all Degrees must ex- pect more or less, some kind of Molestation. Let the Princes of Italy prepare to prevent some new & ap- proaching danger, perhaps some differences may arise in the Conclave amongst the Cardinals, or the Death of some Great Person amongst them, may leave Disorder. This should prove a busy time, considering the Season, now every Man strives to advance, <i>Aut</i> <i>Cesar. aut nihil.</i> Novem-

Star of the <i>Pleiades</i>	o a 0	o 0	o 4	0N	3	♂

III. *The Explanation and Use of the Precedent Tables of Fixed Stars.*

THE Table of *Pleiades*, or *Seven Stars*, contain ten Columns; the first towards the left hand, expresses every fifth day of each Months, as 1, 6, 11, 16, 21, 26. The second shews their Rising in Hours and Minutes: The third their Southing: The fourth their Setting, as is plain by their very Titles. And observe, That the letter (a) denotes afternoon, and (b) beforenoon; and so in the fifth, sixth, and seventh Columns the same; as also the eighth, ninth, and tenth, is continued the Rising, Southing, and Setting of the *Pleiades*, for every fifth day throughout the Year. In the second Table of *Fixed Stars*, is express'd, how many Hours they Rise, South, and Set either before or after the 7 Stars in the first Table, as the letters (a) for afternoon, and (b) beforenoon denote, which is plain and obvious, and has been Exemplified largely in my former Almanacks.

A D V E R T I S E M E N T.

The Famous German Doctor, at the Angel and Ball near to St. Clements-Church, in the Strand.

HE is very Successful in Curing all Sorts of *Ruptures*, without hindrance of Business, and Directs such easy Trusses not hitherto known. He has Incomparable *Medicines* for the Absolute Cure of the *Falling Sickness*, and such *Medicines* being given to Infants as soon as Born, the first thing, as Young Children will prevent *Fits*, or any kind of *Convulsions* during Life. Also for the most Intolerable Pains of the *Gravel* and *Stone*, he never fails to give immediate Ease, and Dissolves the *Stone* without Pain or the least danger to Life. He is Infallible at the Cure of the *Venerereal Distemper*. All *Rhumatisms*, and all *Sciatical Pains*, and indeed any Disease Incident to Humane Bodies. Being a Person of Long Experience, which has Perform'd Wonders in this kind, and well Attested.

THE *Elements of Arithmetick*, in III. Books, the 7th, 8th, and 9th of *Euclid*, with the *Practical Arithmetick*, in Two Books; being useful for all *Mathematicians*, *School-Masters*, *Merchants*, and Students in all Sciences, &c. Being from that Learned and Known Latin Author *Andrew Taquet*, and now Translated into *English* by an Eminent Hand, for Publick Use, with a *Table of the Contents* thereof. Printed and Sold by *William and Joseph Mawbal* at the Bible in *Newgate-Street* where you have *Cook's Marrow of Chirurgery*, and *Tachenius's Clavis*, Translated into *English*, both mention'd at large

The Second Part of COLEY for 1704.

Since the Creation, and since Noah's Flood,
By Authors (sure) was not well understood,
For their Accounts do so much disagree,
They cannot well be reconcil'd by me:
But what seems probable to bear true date,
I shall here succeed in Chronology relate.

Since the Birth of Christ 1704
England first received the
Christian Faith 1527
The Tower of Lon. built 1133
Cambridge was made an Uni-
versity 1069
The Conquest of England by
D. Will. the Conqueror 836
The Bridg built with stone 515
The first Mayor of London 513
The Royal Exch. first built 139
The Plague in London, whereof
died 30598 101
The Gunpowder-Treason No-
vemb. 5. 1605. 99
The Plague in London, whereof
died 35418 74
The great Plague in Cambridge 72
The Earl of Strafford beheaded 64
The great Fight at Edge-hill 63
The Rainford Fight 63
The Marston-Moor, July 2d. 60
The Tewbury first Fight, Sep. 20. 59
The Tewbury 2d Fight, Sep. 29. 59
The fatal Battel at Naseby, June 14. 59
The Bp. of Cant. beheaded 59
Charles the I. murdered 56
The Duke Hamilton, L. Capel, and E.
of Holland were beheaded 56
The Worcester Fight, Sept. 3. 53
The Cromwel died Sept. 3. 46
The Gen. Monk marched to Lon. 45
The King Charles II. arrived in
London, May 29. 44

Upon the Twelve Signs.

Y THE eager Ram rules both the Head and Face,
♄ The Neck and Throat is sullen Taurus's place.
♊ Resembling-Twins the Arms and Shoulders guide,
♋ The slow pac'd Crab the Breast, the Spleen, and Side
♌ The Heart and Back's the generous Lion's share,
♍ The bashful Maid of Belly and Bowels takes care.
♎ To the just Ballance Reins and Loins belong;
♏ The Secrets, govern'd by the Scorpion.
♐ The Ivory Thighs the Archer doth affect,
♑ The Goat our complemental Knees protect.
♒ The nimble Legs t' Aquarius Lot doth fall;
♓ The active Feet to Pisces; and there's all.

*These Characters are no enchanting Tools
For crafty Knaves to bubble credulous Fools;
But Wise-mens Marks; that briefly represent
The several useful Objects thereby meant.*

*Who knows them well, and can them right-apply,
Has the true Groundwork of Astrology.*

Astrology

Astrological Judgments upon the Year 1704

by HENRY COLEY, Student in the
Mathematicks.

I here invoke Uraniah to my Aid,
And all the Muses, Let it not be said,
But to your Lovers you repay good Will,
Disdain not to impart some of your Skill.

Sun, Moon and Stars assist me with your Rays,
Grant Power as you were wont in Herme's Days.

THE last Year I publish'd some brief Remarks upon the late famous Conjunction, and what Changes and Alterations happened upon some former Conjunctions of Saturn and Jupiter, especially those in the *Fiery Triplicity*. We labour under the Effects of the last, which happened in the Signs in May 1702. and will operate more or less, till they meet again in Sagittary, 1722. A Table of those Conjunctions through the four Triplicities for many Years before and after Birth of Christ may be seen in *Holwel's Catastrophe Mundi*, and *Lilly's Ephemeris*, publish'd by my self for the Year 1683. In my Friend Mr. *Francis Moor's* Almanack, 1702. to which I refer the inquisitive Reader, but think it necessary to give some Account of the Nature of such Conjunctions which are considered, above 20 Years since, and publish'd much before. — I need not inform the *Astrological Reader*, That of the Conjunctions of Saturn and Jupiter, there will be three, viz. Great, Mean, and Lesser Conjunctions. 1. The Great Conjunction is that, after a full Period and Revolution of the Circle; that is, when those Planets have made their full Conjunctions throughout the four Triplicities, and do meet in the first, which is always in the fiery Trigon, accomplish'd in 794 Years and some few Days.

2. Mean Conjunctions are those which are made after their going of one Sign, and conjoining in another succeeding Triplex, as from Aries, Leo, Sagittary, which is the first then into Virgo, Capricorn, thence to the next Triplicity, Gemini, and Aquarius, which is the 3d, and lastly into Scorpio, and Pisces, the fourth, Triangularity which is accomplish'd in 199 Years odd 1 Days. (3.) But the lesser or least Conjunction is said to be those that happen or fall in Signs of

the same Triplicity, and in these the Superiors meet once in 20 Years, and sometimes but 19, as may be seen by that Table; and thus they make 10 Conjunctions in one and the same Trigon, and consequently 'tis near upon 200 Years before they change their Triplicity, which is almost 800 Years before they compleat their Revolution through the four Triplicities or the whole Circle.

(4.) Those that have taken the pains to try by Calculation to find the true Distance in time between one Conjunction and another, since their last Return into the fiery Trigon, do find so much Variety that no certain Rule can be given, but it must be performed by Calculation — As for Example, from the 7th of December, 1603, the Time of the 1st Conjunction in Sagittary (at the last Return into the Fiery Trigon) to the 7th of July, 1623. (*viz.* the time of the second Conjunction in Libra) is 19 Years 212 Days, and from thence to the 16 of February 1643 (the Time of the third Conjunction in Pisces) which should have been in Aries, is 19 Years 224 Days, and thence to the 4th Conjunction, October the 10th, 1664. 20 Years, 224 Days, and from thence to that in October, 1682. 19 Years just but there fell two Conjunctions more the same Year in Libra, a Retrograde Motion, and coming direct again, made a Triple Conjunction, and therefore the more considerable, as you may well remember from its stupendious and admirable Effects the last 20 Years before 1702. The Conjunction of Saturn and Jupiter do certainly convert and change things in the World, and the Observations of all Ages are Testimonies sufficient to confirm it, nay even in our present Age we have been Eye-Witnesses that very eminent Transactions have succeeded in Celestial Congresses, and other Phenomena, as I repeated in my last Year's Almanack, at large, and therefore no more to be said thereof here.

(5.) 'Tis worth our Observation to consider that all the Conjunctions at their Entrance into the Fiery Trigon, since Creation have ever been in the Sign Sagittary (not Aries) appears by Calculation, there may be a secret Mystery here; Sagittary is the great Dignity of Jupiter — who is accounted (by Analogy) the Patron of Justice, Peace, Tranquillity, Religion, &c. — The first Conjunction of those Planets in the Fiery Triplicity was Anno ante Christum (as appears by Calculation) 3958 Years, Feb. the beginning thereof, in 8 Degrees of Sagittary, and this was not many Years after the World's Creation, as 'tis generally supposed by the Learned: But

ther in his *Annals* who makes the beginning of the World to be 4004 Years *Ante Christum*; which if so, 'tis 46 Years after the Worlds Creation — The *Second Conjunction* was (in this Trigon) in the Year before Christ, 3164. (as appears by Calculation) 'twas in the beginning of *November*, that is 794 Years Months Distance, and this *Restitution* fell in the 5th Degree of *Sagittary*, which happened (as appears by Chronology) in the Days of *Enoch* and *Mathusalem*, who was born to *Enoch* when he was 65 Years old 3317 Years before Christ. The third Entrance tho' second *Restitution* of this Trigon, was 2370 Years before Christ (as appears by Calculation) and it fell in the latter end of *December* in 8d of *Sagittary*, the Distance of these two Returns is 794 Years and near 2 Months — This was in the second Age of the World, and the Universal Deluge call'd *Noah's Flood* happen'd 2349 Years before Christ, at the next Year after there was a *Conjunction* of *Saturn* and *Jupiter* in *Leo*, so that 'tis certain 'twas during the *Conjunction* of the Superiors in the *Fiery Triplicity*, and now the Years of Man's Life were made (as it were) half shorter than they were before.

The fourth Entrance (tho' third Return) was *Anno Ante Christum*, 1575, there happened Three *Conjunctions* in this Trigon, the first was about *March* the 12th in 9d of *Sagittary*, the second was a *Retrograde Conjunction*, which fell about the 20th of *May* in 8d of *Sagittary*, and the last about the 26 of *September* following, about 4 degrees of the same sign, this was in the 3d Age of the World, about the time that *Moses* and *Aaron* flourished, and King *Pharaoh* excels'd his Cruelty in *Egypt*, also the Children of *Israel's* Delivery from the *Egyptian* Bondage, &c. and many other remarkable transactions in those times.

The Fourth Return, but fifth time they entered this Trigon was 781 Years before the Birth of Christ about the beginning of *December* in the 13th of *Sagittary*, about this time the *Ten Tribes* were lead into Captivity, this was the Monarchy of the *Medes*, and some few Years after this *Conjunction* we may read that *Sennacherib* King of the *Assyrians* having 185000 of his Soldiers slain by an *Angel*, leaveth the Siege of *Jerusalem*, and fleeth away, but presently after is slain by his Son *Adrammelech* and *Sharezer*, 2 Kings 19. 37. about this time lived *Habakkuk* the Prophet.

The Fifth *Restitution*, but Sixth Entrance was in the 15th Year of Christ, about the beginning of *December* in 12th of

Sagittary. Now *Tiberius* the *Emperor* begins to flourish, and *Augustus* died; under this *Conjunction* also was the *Passion* and *Resurrection* of our *Saviour*, and many other memorable things performed in the *World*, as we may inform our selves if we do but consult the *History* of those times.

The sixth *Return*, but 7th *Entrance* was in the *Year* of our *Lord*, 809. about the 20th of *October* in 6. deg. of *Sagittary* about this time reigned *Charles the Great*, and in the *Year* 814. after *Christ* he died at *Aquisgrane*, *January* 28. and now the *Western Empire* is translated to the *Germans*, and the remains at this time in some *Disorder*.

The seventh and last *Return* (tho' the 8th *Entrance*) was in the *Year* 1603. *December* the 7th in 8d of *T.*, and under this *Trigon*, we and our *Successors* must content our selves to labour for at least another *Age*, viz. till the *Year* 1802. and the *Conjunctions* will fall in the *Earthly Triplicity*, viz. in *Virgo*, *Taurus*, and *Capricorn*, &c.

(6.) And 'tis well known to all *Europe*, that many eminent *Changes* and *Mutations* have happened therein since this last *Return* of *Saturn* and *Jupiter* into the fiery *Triplicity* of which a large *Volume* might be written—and we must long continue under the *Dominion* thereof as aforesaid, and therefore 'tis no strange thing to see and hear daily of so great *Alterations* in several *Kingdoms* and *Countries* in the *World*, which perhaps no *Age* can parallel, chiefly arising from *Religious Pretences* and unhappy *Differences* therein, also *Breach of Leagues*, *Antient Customs*, *Just Privileges*, long enjoyed *Rights*, &c. which the *People* of *England* especially, will never bear, but contend for vigorously—as free-born *Subjects*, &c.

Astrological Observations upon the *Quarterly Ingresses* of the *Year* 1704. and first of the *Winter Quarter*, ☉ in ♍ which this *Year* commences, *December* 17th, 1703. at 11h 11' morn which time we have 19d of *T.* culminating, and the beginning of ☿ *Ascending*, the *Moon* separates from a * of *Saturn* and *Opposition* of *Mercury*, and applies to the ☿ of the ♋ which happens to be a great *Eclipse* of the *Moon* in the Beginning of *Cancer*; *Saturn* is in the *Horoscope* in Δ to *Mercury* upon the *Midheaven*—and the ☉ hastens to the Δ of ♋; thus stands the *Position* this *Winter Quarter*, which is very remarkable—and may have as notable *Effects*. The ☾ is near her *North Node*, and the ☉ with *Canda* her *South*—So from a serious *Consideration* of what ought to be considered, I may deduce this following *Judgment*, that there are yet

of People amongst us, that remain as much dissatisfied
 and uneasy as ever—and 'tis to be feared, that we shall hear
 much Misery and sad Calamities to befall the Generality of
 Mankind in several parts of *Europe*, which I delight not to
 aggravate; People should strangely afflict themselves now with
 Fears and Jealousies of some secret Mischief hatching against
 them, for the *Moon* doth not only separate III, but applies
 herself—that is, to the Opposition of the *Sun*, which should
 be some of the madder sort against their *Superiours*, or at least
 explain much of their Actions too openly, and many Diffi-
 culties very fraudulently and subtilly smothered up, and from
 hence we may also expect sudden Accusations brought against
 mean Offenders—and we shall, I fear, find it too true; for
 ill-headed Spirits to endeavour to subvert the Peace and
 tranquillity of those Nations they inhabit, and to oppose and
 shake the Authority they live under. Many others fall into
 religious Controversies, or at least make it a Cloak to conceal
 their occult Designs—In short this should prove a very *Active*
Quarter in General, considering the Season of the Year, and
 we may expect to hear of various Turns and Overtures in
 mundane Affairs—A general repining and Complaint for want
 of Trade,—Many treacherous Consultations, Breach of Leagues
 and Friendship—This Quarter will also be attended with very
 great Councils and Consultations, such perhaps that were not
 expected, and by some as little desired—The Weather should
 be sharp enough, cold and cloudy, and the Diseases many and
 violent, and too many of dangerous Consequence, and chiefly
 those of the aged sort, and so I proceed —
 To the Consideration of the *Spring Quarter*, which this
 year takes beginning *March* the 9th, 1^h 17^h P. M. at which
 time we have 21^d of γ upon the Mid-heaven, and 11 degr.
 of α Ascending, the γ between the Trines of *Mars* and *Ju-*
pter, but hasting to the δ of the *Sun*, *Saturn* is upon the
 12th of the Mid-heaven in γ , and *Jupiter* intercepted there-
 in in δ in Trine to *Mars*, and the γ , δ in $\square$ to ψ , η in
 to ψ , which is a true Account of the *Figure* at the $\odot$'s
 ingress into *Aries* our English *Ascendant*, this is a very signi-
 ficant Position of the *Heavens* in earnest, whence I may rea-
 sonably conjecture it may prove a very busy *Quarter*, and ma-
 ny very material Matters transacted therein, and the whole
 year, a Year of Admiration and very considerable Action in
 most Places of *Europe*, where they are prepar'd for Action—
 The *Superior Planets* (together with the $\odot$) are to be con-

sidered chiefly in any Revolution, and here *Saturn* culminates and *Jove* is in the Mid-heaven in Trine to the ☾ and *Mercury*. Now certainly the common People are better pleased than the last Quarter, with the Actions of their Superiours, and some great Matter is now in Agitation as well as Expectation for by this Position the Planets should be more powerful in their Operation, more strong in their Influence, as being high posited in the Heavens, and therefore usually produce (in a natural way) more Glorious Effects,—That is, It should incline the Minds of some great Persons, now at this very juncture of Time to attempt great things to good purpose; and this cannot be projected or carried on without great and weighty Councils: It animates those Noble Hero's to an eager and delightful Progress therein, and if so, we have just reason to hope well, and in few Months time a very happy Issue, the Position of *Saturn* so Rampant upon the Mid-heaven *Aries* our Ascendant, do not obstruct or hinder, by the secret Actions of some Elderly subtle Person or Persons among us, as lie like Snakes in the Grass.—But if any such thing should be, there will be a plain Discovery thereof, being so near the *Sun*, and in a short time too, and not on so, but a just Reward inflicted for such treacherous Acts. I hope better things, and that this Quarter may produce something extraordinary. Consult the Observations of *Mercury* April, and May, &c.

Of the Summer Quarter, which this Year begins June 30th, 1^h 41' P. M. at which time we have about 24 degrees of *Cancer* upon the Mid-heaven, and 18^d of *Libra* Ascending whence all the Angles are Cardinal Signs, *Mercury* near the Cusp of the 10th in Δ to *Mars*, and *Jove* in ☿ with *Venus* the ☾ devolves from the Δ of *Mercury* and ♀, and applies to the Δ of the ☉ and ✱ of ♄, and thus stands the Position of the Heavens at the *Sun's* Ingress into *Cancer* this Summer Quarter; 'tis indeed a most excellent Position, and promises very hopeful Effects, and shews that many great Persons in the World that have been troublesome enough both to themselves and others, begin now to retire, and would be glad to be quiet if they could; and now we may expect many Deliberate Councils to good Purpose—'tis observable, that in the Three Schemes of Ingresses, *Mars* is posited in no Warlike Signs, but the Planet *Saturn* in the two first, was indeed, ♄, and never therein brought any good to England, witness the Years 1643, 1644, and 1645, as also in 1672, 1673, &c.

674. such is his *male Influence*; but in this *Ingress*, he is enter'd into *Taurus*, so that it may be hoped the greatest of his Mischiefs is over. Now about this Time we may expect very stupendous Councils, and very notable Actions of great Concernment in hand in the *Macrocosm*, and they will be manifested partly in civil Affairs and common Transactions, and partly in Martial Councils and Concerns, and this perhaps suddenly when least expected: And thus I may conclude, that the World stands as it were amaz'd, suspecting its own Fate. The Merchants may this Quarter expect good News to their Encouragement and Satisfaction: The Weather proves extreme hot, and the Air dangerous and unwholesome; let every Body that prizeth his Health endeavour to Antidote himself against Infection. In short, the Configurations of the *Planets* this Quarter are very significant, and they will certainly have notable Effects—And thus we may freely attempt to give warning to Mankind of the Accidents both good and bad, that may casually happen unto them, that they may therefore prepare themselves accordingly.

Of the *Autumnal* or *Harvest Quarter*, which this Year begins *September* the 12th at 2^h 48' *mane*; at which time about 4 Degrees of γ Culminates, and 26 Degr. of π Ascends at *London*, the $\curvearrowright$ separates from a $\square$ of γ and applies to the $\ast$ of the $\odot$, $\triangle$ *Mars*, $\square$ *Saturn*, and $\ast$ γ . And *Mercury* hastens to the δ of *Saturn*, the $\odot$ to the δ of *Mars*, who is in δ to *Mercury*, as may be seen by the Figure, and here the Angles are all fixed, *Mars* is now in γ , *Saturn* in γ , and γ in Π , the first 3 Signs of the *Ecliptick* and all above the *Earth*—the $\curvearrowright$ is also very powerful in δ in the 11th all which renders it a notable Position of the Heavens, which may very probably have as Remarkable Effects. For the Actions of this Quarter begin with very fair Pretences, and the People are now again in Expectation of very hopeful Proceedings for the General Advantage of the whole Nation, and in my Opinion there seems little or no Contradictions during this Quarter, in the great Affairs of the Publick; but very mature Councils are continued, to the general Satisfaction of all Loyal Persons, and true bred *English* Hearts. And now from the Influences at this time in Operation we have good Grounds to hope well, since about this time there must be very effectual Conclusions in Agitation, and I hope very near a most happy Period. In short we may yet expect the Actions now on foot to be of great Concernment in *Civil-Affairs*, and if so, then all deserving

ving Men may expect Encouragement, and some of them about this time receive Marks of Honour conferr'd upon them; and not only so, but as generous Rewards from their Superiours; and this relates to us, of the *English Nation* chiefly; but much News arrives from Foreign Parts, of casual *Actions* or Accidents amongst some of them—as of *France*, *Spain*, *Germany*, *Italy*, *Holland*: Also *Poland*, *Denmark*, *Sweden*, and some other Places, are menaced more or less this Summer, but in what kind I shall not adventure positively to determine, all I shall say, *Tempus Declarabit Omnia*. The Merchants have now good hopes of very considerable Returns, not only from the *Eastern* but *Western Parts* of the World; and to conclude, I doubt not but good things will be not only attempted but effected this *Quarter*, perhaps we may have much dark and cloudy Weather, and a sickly Season this Fall of the Leaf; *Corn* and *Coals* advance and bear a good Price, and now by this time we may expect a large Account of all those notable Transactions that have been carried on with great Courage and Conduct, I hope to good purpose throughout *Europe*.

Of the *Eclipses* falling this present Year, they are in Number only Four (some say 5) But there will be but one *Eclipse* of the *Moon* visible in our Horizon. They fall in this Order; viz.

The first is an *Eclipse* of the *Sun* upon the 22^d Day of *May*, a little after Noon, and yet will not be visible in any part of this Kingdom, for the great *South Latitude* of the *Moon* augmented by her *Parallax* of *Latitude*, the Sum whereof being much greater than their *Semidiameters*, prevents its being visible with us, nor will it be but a small one where 'twill be visible as in *South-Africa*, about *Guinea*, and other Places near the *Black River*, and the more *Southern Parts* of the World to us as yet undiscovered.

The Second should be an *Eclipse* of the *Moon* the 6th of *June*, a little after 6 in the Afternoon, which cannot be visible to us by reason of the *Sun's* being above the *Horizon* and the *Moon* below; and the end of the *Eclipse* is just before the *Moon* rises, which *Eclipse* will be total without continuance. For the *Scruples* deficient are equal to the *Moon's Diameter* as Mr. *Wing* shews in his *Six Years Ephemerides*, those that live 5 Hours and a half East from *London* in the *Longitude* of 10 Degrees 40' may observe it in their *Meridian*, near which lie *Nova Zembla*, *Parthia*, and about the *River Ganges*, near the *Gulf of Bengale*.

C O L E Y, 1704.

The Third is an *Invisible Eclipse* of the *Sun* to us—on the 6th of *November*, a little after 5 in the Morning, which may be seen in the *Provinces of India*, and *Parts adjacent*.

But the 4th and last *Eclipse* should be a partial *Eclipse* of the *Moon*, *November* the 30th in the Morning. The beginning should be at 6^h 13'. The true Opposition at 7^h 33'. And the End at 8^h 39' in the Morning. *Digits Eclips'd* 5th 10'. The *Sun's* Latitude at the Beginning 37' 11". At the End 43' 40" North Ascending, the ☾ sets. Eclips'd and is not over by the space of 16' 34" when then ☾ sets. This *Eclipse* falls in near 10 Degrees of the Sign *Gemini*, an *Eclipse* of the *Moon* in the second Decanate of II shews the Motion of Armies, and declares Mens Solicitations and Cares both of publick and private Affairs, and that Judges will be careful of executing Justice: But the third Decanate foretels the Death of some famous Man, and he should be a Person of the Gown, either a Divine or Lawyer—and the Effects of this *Eclipse* may fall in the City of *London* as well as in some other Eminent Places of Europe. This *Eclipse* falls in the West Angle, in an Airy Sign and double bodied, and therefore threatens Matter to Kings, Princes and Principal Magistrates, a Defect falling in the High House shews the Change and Mutation of Laws and Customs, also Contentions, Law Suits, Quarrels, Wars, the Death of Aged Men, and generally, for the most part some laughter or Bloodshed.

And thus I have considered the four Ingresses of the *Sun*, and the *Eclipses* of the *Luminaries* for this present Year, also something of the Nature and Effects of Conjunctions of the Superiour Planets; and now to oblige the more Curious and Inquisitive sort of People, and in Regard there has been so much Talk and Enquiry after an Hieroglyphical Prophecy formerly published by the Famous Mr. *William Lilly*, in his *Almanack*, 1655. and now in Operation in *England*, I have here published the same from the same Book, just as it was, also all that was writ upon it, that the more intelligent sort may make their Observation thereupon, and the rather because some have already put a false Construction thereupon: For this Figure clearly represents the Kingdom of *England*, as is express'd by two Letters, A. R; or A. *Anglia*, and R. *Regina*, not A. *Anna*, and R. *Regina*, as some contrary to the Intention of the Author, are pleased to interpret it. And the Escutcheon with the Flower-de-Luce and Half-Moon thereon doubtless represents two other Kingdoms at least, who may

COLEY, 1704.

may contend with the Kingdom of England, to small purpose, and now is the time we may expect to see it verified —

A. Angliæ. R. Regnum.

Full fifty Years and more 'twill be,
E'er England's Kingdom thou shalt see ;
Therein no Honour canst thou have,
Or so much Earth that makes a Grave ;
Forbear, forbear, it's thy sad Fate
To feed the Fish, &c. —

In the Year 1702. and for some Years succeeding, let England expect the Explanation of this last Hieroglyphick, not before the

Something of the Nature of Hieroglyphicks, a Word compounded from two Greek Words, viz. Sacred, and to Engrave, viz. Holy Inscription, or Sacred-Engravement, and by such mysterious Words and Characters the Egyptians comprehended and concealed all their Divinity, Philosophy, and choicest Secrets, from being discovered and profaned. By this Invention they had a design to render their Knowledge immortal, for which purpose they did engrave them upon Pillars of Marble, and this long before the use of Paper—And the

represented the *Providence of God*, by a *Basilisk* with an *Asp's Head and Eyes*, because there is no other Creature so full of *Spirits and Vigour*, or more quick sighted. The *Power of God* they express'd by a *Body and Three Heads* (by which one would almost have thought they had some Knowledge or Notice of the *Trinity*) but without either *Hands or Feet*; because *Almighty God* governs all things only by his *Wisdom and good Pleasure*. and needs no visible Members to produce his Wonders. The *World* was sometimes represented by a *Round Temple*, because *Divine Majesty* has created it for his own *Glory* to receive therein the *Adoration and Homage* of all Creatures. *Wisdom* was represented by a *Beautiful Woman* with *four Ears*, and *four Hands*, but with one *Tongue*, which was hid within her *Lips*, that were shut close. *Unity* was represented by the *Sun* and its beautiful *Beams*; *Peace and Worldly Felicity* by the fruitful *Olive Tree*, *Liberty and Pleasure* by the *Vine*, *Chastity* by *Beams* and a plentiful *Encase*, by *Mustard-Seed*, which grows up into many and large *Branches*. A *Furious Man* was decypher'd by a *Lyon* eating up his *Prey*, a *Religious Man* by a *Lyon* running from a *Cock*, a *Whore* by a *Lyon* with a *Woman's Head*, because her *Countenance* is fair, her *Speech* pleasant, her *Allurements* powerful, but her *Nature* fierce and cruel, and she intends to prey upon both *Body and Estate*. A *Merciful Man* represented by a *Lamb* lying at his *Feet*, a cunning selfish *Timeserver* by an *Hedge-Hog*, because this Creature wraps himself up in his own *Warm Down*, and turns out *Prickles* to all the *World* besides. A *Proud Man* by a *Peacock*, an *Hypocrite* by a *Chameleon*, a *Prophet or Prophecy* by a *Mole*, *Revenge* by a *Tyger*, &c. And 'tis very frequent in *Holy Scriptures* to express, *Persons, Kingdoms, Judgments*, and other things to come thus *Hieroglyphically*.

Now of these kind of *Hieroglyphicks* you may see Variety of them published by Mr. *Lilly* in his *Monarchy or no Monarchy*, 1651. which are again repeated with some others in *Holwel's Catastrophe Mundi*, 1682. And here to conclude this Discourse, take this Prediction of the last Ages of the *World* *Ænigmatically* delivered in 12 Months, representing so many notable *Periods or Catastrophes* which shall certainly happen in those times, publish'd many Years since in the *fore-said Book* by Mr. *Lilly*—*January*. A Shower of *Blood* shall rain continually for one *Hours* space, in a certain *Land of Europe*, that *Region* or the *People* thereof shall first come to *Destruction*.

February.

February, All Nations troubled with Rumours of Wars, every Region preparing Armies, and mustering Men, Traffick generally prohibited or obstructed by Land and Sea, each Country being enforced to live on their own Stock and Commodities. *March*, The main Sea shall hugely swell with mighty Tempests and Winds, so that the Banks being overthrown, five Waves shall in many places overflow their accustomed Bounds, and cause universal Inundations, one Island shall be quite overflowed with the Sea, where the double Cross hath Government the Sins of the Prince or Rulers thereof being so extream high against the Majesty of God. *April*, A terrible Sea-Fight, such as hath not been before, occasioning the Water to look more Red than the Red-Sea, the Water all turn'd to Blood. *England* thou wilt have a share in this Fight, God of his great Goodness make thee victorious, after a hard Fight thou shalt overcome. *May*, War and Bloodshed over all the Earth, a certain Nation shall send so many Men to the Wars, that it shall for a time be even desolate of Men, so that Twelve Women shall be glad of one Man. Nay hardly procure one young Man for them all. *June*, In the Eastern Parts of the World, a whole Nation shall fight a great Battle in a wrong Cause, and defend an Evil Man; but the Vengeance of God will rain down a Shower of Fire from the Throne of Heaven, and consume that Army wholly with all their Wealth and Treasures even as they lie in their Tents, &c. *July*, So great a Drought, so great a want of Water will appear, that Multitudes of People shall die in many Places, for meer want of Water; Soldiers shall not be able to carry their Arms, the Earth shall be so dry and so parched with the Sun's hot Beams, that it shall yield no Fruit to feed Cattle. *August*, Great Plagues and Mortality will cover the whole Face of the Earth, and so destroy Mankind, that there will not be sufficient Labourers to gather the Harvest, or the Fruits of the Earth. In this Month such Swarms of noisom Fowls, and Flies, shall come from the East, as they shall devour the Corn on the Ground, the Fruit on Trees, that all shall be barren. Men living in those Times, and in this Month shall have more Sorrow and more Woes, and more Famine and Distress than was in Jerusalem when Titus besieged it. *September*, The Season of this Month will be so unnatural, and the Earth so unfit for Tillage, that all manner of Cattle shall rot upon the Ground, which will breed such Store of Flies and Vermin, that the Earth will be employed, and receive no Fruit to encrease. *October*, A great Pa-

ine and Dearth of Corn will overspread most Nations of Europe, so that the Child shall starve at the Mothers Breasts, the Mother having no Food to nourish her self or Child. November, One appears suddenly and unexpectedly a great Conqueror, the World filled with the Fame of this Man, who suddenly like Augustus gives Peace to the whole Earth. December, All Wars end, Religion truly preached universally over the World. A General Peace, no more Treason or Rebellion. Not long after the Trumpet sounds and Christ appears, which must be the end of the World.

THE CONCLUSION.

And here my Task must end, and what I've writ,
Unto the Reader's Judgment I commit,
If in this Work some Errors thou dost find;
Let them be pardon'd, and you will prove kind.
But never blame the Art, the Error mine is,
And to all Faults I here will put a FINIS.

ADVERTISEMENTS.

Mellificium Chyrurgie, or the Marrow of Chyrurgery, with the Anatomy of Humane Bodies, according to the most Modern Anatomist, illustrated with many Anatomical Observations, Institutions of Physick, with Hyppocrates Aphorisms large-commented upon. The Marrow of Physick, shewing the Causes, Signs, and Cures of most Diseases incident to humane Bodies, choice experienc'd Receipts for the Cure of most Distempers. The Fourth Edition enlarg'd, with many Additions, illustrated in its several parts, with 12 Copper Cuts, by James Cook of Warwick, Practitioner in Physick and Chyrurgery, revised, corrected and purg'd from many Faults that escaped in the former Editions by reason of the Author's great distance from the Press, by Thomas Gibson, M. D. and Fellow of the College of Physicians, London. Licensed by the College of Physicians, Price 6 s. bound. Printed for William and Joseph Marshall at the Bible in Newgate street. Likewise Otto Tachenius his Hyppocrates Chymicus, discovering the Ancient Foundation of the late Viperine Salt, with its Clavis thereto annexed, Translated into English by J. W. Price bound Three Shillings.

MR. Robert Bateman's Famous Spirit of Scurvy-grass, both Plain and Golden, which have perform'd so many eminent Cures in the Dropsie, Scurvy, and most other Distempers, the true Method of preparing and making whereof was only taught and communicated by the said Bateman to Mrs. Martha Hooker
